

Middle School CAMP STEM

The Middle School Camp STEM took place from June 14th, 2021 to June 18th, 2021. This camp involved middle school students located in Raleigh County. The students had many sessions taught by both WVU Tech professors and WVU Tech students. These sessions included electrical engineering, chemical engineering, mathematics, web development, robotics, and biology. On the first day, the students and mentors also enjoyed a group trip to the Boy Scout Summit.

(a) Participating students learning about electrical engineering

(b) Participating students learning about chemical engineering

(c) Participating students learning about mathematics

(d) Participating students learning about web development

(e) Participating students learning about robotics

(f) Participating students learning about biology
